

Double in a Day Forex

For Forex traders who want to double their Forex Trading accounts

<http://www.doubleinadayforex.com/>

Normally doubling your account in 1 trade is quite an achievement. That is the purpose of the Double in a Day EA.

The 3 trades below were successful DIAD EA trades where **5% of the account was risked to generate 200% return in 1 trade** each time. \$25 were turned into \$1000 in 1 trade using 3 top ups during the transactions. For those who own the DIAD EA the following strategy was used. Just change Buy to sell if required.

The DIAD EA allows for the use of pending orders which is particularly handy for catching channel spikes when they occur.

Support and resistance concepts related to Channel trading were used in most cases as Channel trading is one of the few trading techniques that allows traders to capture 100% of a particular move.

The first trade used time of day and resistance bounce retest techniques to find a good entry. This is a good example of a lucky spike entry when using pending orders.

Order	Time	Type	Size	Symbol	Price	S / L	T / P	Time	Price	Profit

The second trade was a Classic Channel trading trade capturing close to 100% of the move. Again a pending order would get you into this type of trade.

Order	Time	Type	Size	Symbol	Price	S / L	T / P	Time	Price	Profit
59327760	2016.11.18 12:26:36	sell	0.70	gbpjpy	136.262	136.514	135.641	2016.11.18 13:09:07	135.666	379.22

More advanced Channel trading using dominant angles with in the Channels. A confluence of horizontal and non horizontal support can create good bouncing opportunities.

Order	Time	Type	Size	Symbol	Price	S / L	T / P	Time /	Price	Swap	Profit

When risking 5% to make 200% your risk return ratio becomes 1:40 – That effectively means that if only 1 out of 40 trades are successful you will be profitable. That is why some traders use this approach.

Using support and resistance together with channel trading does create good Double in a Day opportunities. Even if you are only going for 100% return on 5% risked.

Please note that the above trades require considerable skill, experience and patience. Do not attempt at home unless you have a proven record of identifying large breaks or turning points in the market.
