

Double in a Day Forex

For Forex traders who want to double their Forex Trading accounts

<http://www.doubleinadayforex.com/>

A few 80 Pip trend Double in a day trades done during the period 5 Dec to 8 Dec 2016

Normally doubling your account in 1 trade is quite an achievement. This is however the purpose of the Double in a Day EA.

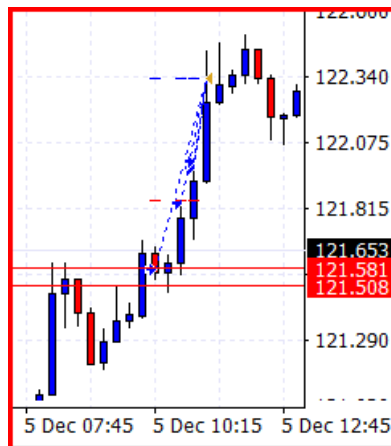

The 20 trades below were successful DIAD EA trades where **5% of the account was risked to generate 100% return in 1 trade** each time. \$50 were turned into \$1000 in 1 trade using 3 top ups during the transactions.

For those who own the DIAD EA the following strategy was used. Just change Buy to sell if required.

EA Floating Account Market Execution + - Fade Shine
 DoubleInADay version 3.1.1 on EURJPY H1 chart w/magic 20131026
 Trading - SELL for 80 pips, re-entry 0 done out of unlimited
 Risk - Approx USD 50 or about 5% of 1000 Account Size for Initial only
 Reward - Approx USD 1020 or about 102% of 1000 Account Size
 Initial - EntryPct:0% EntryPip:0.0 Lots:0.48 SL:12.0 TP:54.5 Profit:227.08
 Topup1 - EntryPct:30% EntryPip:24.0 Lots:0.75 SL:9.4 TP:30.5 Profit:198.23
 Topup2 - EntryPct:40% EntryPip:32.0 Lots:1.35 SL:8.3 TP:22.5 Profit:264.31
 Topup3 - EntryPct:50% EntryPip:40.0 Lots:2.62 SL:8.1 TP:14.5 Profit:330.38

So 5% of the account was risked (\$50) to earn 102% of the account (\$1 020). Top-ups were done 30%, 40% and 50% on the way to the target. An 80 pip target was used

When risking 5% to make 100% your risk return ratio becomes 1:20 – That effectively means that if only 1 out of 20 trades are successful you will be profitable. That is why some traders use this approach.

The examples above should give you some ideas how support and resistance is used to create Double in a Day trades

Please note that the above trades require considerable skill, experience and patience. Do not attempt at home unless you have a proven record of identifying large breaks or turning points in the market.
